

BHUSHAN SHELKE

Akola, Maharashtra | +91 9359082546 | bhushanpatil6129@gmail.com | linkedin.com/in/bhushan-shelke07

PROFESSIONAL SUMMARY

Software Engineer with a PGCP in Big Data Analytics (C-DAC Mumbai) and a B.E. in IT. Specialized in architecting distributed backend microservices, high-throughput data pipelines, and LLM orchestration layer implementations (RAG). Proficient in FastAPI, asynchronous processing, vector indexing, schema design, containerization (Docker), and Big Data processing frameworks (Spark, Kafka, Hadoop, Airflow).

EDUCATION

Centre for Development of Advanced Computing (C-DAC), Mumbai
PGCP in Big Data Analytics (PGCP-BDA)

Feb 2026 – Aug 2026

Ram Meghe College of Engineering and Management, Amravati
Bachelor of Engineering (Information Technology), Sant Gadge Baba Amravati University

2021 – 2025

TECHNICAL SKILLS

Languages: Python, SQL

Frameworks: FastAPI, Flask, REST APIs

Databases: MySQL, PostgreSQL, ChromaDB, Redis

Big Data: Spark, PySpark, Hadoop, Hive, Kafka, Airflow

AI & GenAI: RAG, Ollama (Llama 3), PaddleOCR, Vector Embeddings

Tools & Platforms: Git, GitHub, Docker, Linux

PROJECTS

PatentMind AI — Intelligent Patent Analysis and Prior-Art Search Platform

Python, FastAPI, ChromaDB, Redis, PaddleOCR, Ollama (Llama 3), RAG, Vector Embeddings | github.com/bhushanpatil3544/patentmind-ai

- Architected an end-to-end RAG pipeline for semantic prior-art analysis across large patent corpora.
- Built high-concurrency FastAPI endpoints for PDF optical character recognition (PaddleOCR), high-dimensional vector embeddings, and low-latency nearest-neighbor search in ChromaDB.
- Leveraged Redis in-memory caching to optimize query latency and deployed Ollama (Llama 3) for contextual inference.

QR-Based Cafe Ordering and Billing System

Python, Flask, MySQL, REST APIs | github.com/bhushanpatil3544/QR-Caf-Smart-Digital-Ordering-System

- Engineered a transactional restaurant POS backend using Flask and MySQL.
- Implemented RESTful APIs with ACID-compliant relational schemas for real-time state management, automated PDF invoice compilation, and optimized order queuing.

CloudGuard — AI-Powered Cloud Security and Compliance Monitoring Platform

Python, PySpark (Apache Spark), FastAPI, SQLite, Scikit-learn, Docker, Power BI | github.com/bhushanpatil3544/cloud-compliance-system

- Built a scalable PySpark ingestion pipeline to normalize multi-cloud logs (AWS CloudTrail, VPC Flow, IAM, S3 access) into Parquet, and an automated compliance engine evaluating CIS AWS Foundations Benchmark, NIST SP 800-53, and PCI-DSS 4.0 rule sets.
- Implemented a Scikit-learn Isolation Forest model for AI-driven anomaly detection on API activity and privilege abuse, with dynamic 0–100 risk scoring, exposed via asynchronous FastAPI endpoints and Power BI dashboards, containerized with Docker.

ACHIEVEMENTS

- 1st Place — AI Model Engineering Hackathon 2026, C-DAC Mumbai:** Solved Python programming and problem-solving challenges under time constraints, demonstrating strong Python proficiency, logical thinking, algorithmic problem-solving, and AI engineering skills.

CERTIFICATIONS

- AWS Academy Cloud Foundations** — AWS (2026)
- Certified Python Foundations (CPF)** — Career Credentials (2026)
- Deloitte Data Analytics Job Simulation** — Forage (2025)
- Excel Macros & VBA for Beginners** — Simplilearn SkillUp (2025)
- PreCAT – Preparatory Course for Entrance Exam** — SunBeam Infotech (2025)
